📄 PROFESSIONAL SUMMARY

Software Engineer with **2+ years** of experience building scalable REST APIs and enterprise applications. Designed and delivered **70+ production-grade APIs** and **reduced** manual data entry by **70%** while improving invoice **processing time by 60%** through backend automation and asynchronous processing

📁 PROFESSIONAL EXPERIENCE

Vervebot.io, *Software Engineer*

07/2024 – Present

- Developed and maintained a production **Inventory & Chain Management System (ICMS)** for a **US-based grocery retailer** using **Node.js, Express.js, React.js, MongoDB, PostgreSQL, Redis, and AWS**.
- Designed and delivered **70+ production-grade REST APIs** for **inventory management, invoice processing, authentication, pricing, and reporting**, with comprehensive **Swagger (OpenAPI)** documentation.
- Reduced manual data entry by 70%** and **improved invoice processing time by over 60%** by automating business workflows and implementing **BullMQ, Redis**, and asynchronous background job processing.
- Automated invoice extraction by integrating **AWS Textract (OCR)** and **AWS S3**, enabling secure document storage and significantly reducing manual processing effort.
- Improved application **performance, scalability, and reliability** by optimizing **MongoDB/PostgreSQL queries**, implementing **Redis caching**, and deploying containerized services with **Docker, Nginx**, and **PM2**.
- Built **CI/CD pipelines** using **GitHub Actions** to automate build, testing, and deployment, collaborating with cross-functional **Agile** teams to deliver production-ready software.

🧠 TECHNICAL SKILLS

Languages

JavaScript (ES6+), TypeScript, GO Lang, SQL

Backend

Node.js, Express.js, REST APIs, JWT, OAuth, Socket.io

Frontend

React.js, HTML5, CSS3

Databases

MongoDB, PostgreSQL, Redis

Cloud & Services

AWS S3, AWS Textract, Cloudinary

DevOps & Tools

Docker, Git, GitHub, GitHub Actions (CI/CD), Nginx, PM2, Postman

AI & Automation

AI Agents, Agentic AI, OpenAI API, Workflow Automation

Core Concepts

System Design, Authentication, Caching, API Security, Microservices

API Documentation

Swagger (OpenAPI)

Message Queue

BullMQ, Redis

📁 PROJECTS

ICMS 🔗, *Tech Stack: Node.js • Express.js • React.js • MongoDB • PostgreSQL • AWS S3 • AWS Textract*

02/2024 – Present

- Built an **Enterprise Inventory & Chain Management System (ICMS)** for a **US-based grocery retailer** using **Node.js, Express.js, React.js, MongoDB, PostgreSQL, Redis, and AWS**.
- Developed scalable backend services and **REST APIs** for **inventory management, invoicing, product catalog, pricing, reporting, and authentication**.
- Automated inventory and invoice workflows, **reducing manual data entry by 60%** and **improving invoice processing time by over 50%** through backend optimization.
- Integrated **AWS S3** and **AWS Textract (OCR)** to enable secure document management and automated invoice extraction.
- Improved application scalability and reliability by leveraging **Redis caching**, asynchronous background processing, and optimized database queries.

Outdraw 🔗, *Tech Stack: Node.js, React.js, Socket.io, MongoDB*

06/2026 – Present

- Built a **real-time collaborative whiteboard application** using **React.js, Node.js, Socket.IO** 🔗, **TypeScript**, and **MongoDB**, enabling multiple users to draw and collaborate simultaneously.
- Implemented **low-latency real-time synchronization** with **Socket.IO** 🔗, ensuring seamless collaboration and instant updates across connected clients.
- Designed a **scalable backend architecture** to efficiently handle concurrent user connections, real-time events, and session management.
- Optimized application performance by minimizing synchronization latency and improving rendering efficiency, delivering a smooth collaborative user experience.

Relook 🔗, *Tech Stack: Node.js, Express.js, React.js, MongoDB, Cloudinary, JWT, OAuth*

12/2025 – 04/2026

- Built an **AI-powered SaaS platform** for collecting, managing, and showcasing **video, audio, and text customer testimonials** using **Node.js, Express.js, React.js, MongoDB, and Cloudinary**.
- Implemented **secure authentication** with **JWT** and **Google OAuth**, enabling seamless user onboarding and protected access.
- Developed **embeddable testimonial widgets**, allowing businesses to seamlessly display customer reviews on **business websites**.
- Built an **analytics dashboard** to provide insights into testimonial engagement and customer interactions.
- Integrated **Cloudinary** for secure media upload, optimization, and CDN-based delivery, improving media storage efficiency and application performance.

🎓 EDUCATION

Bachelor of Computer Applications (BCA), Kurukshetra University

2022 – 2025
