PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 2+ years of software engineering experience building and deploying production applications using **AWS, Docker, Kubernetes, Terraform, GitHub Actions, Linux, Nginx, Node.js, PostgreSQL, MongoDB,** and **Redis**. Experienced in designing CI/CD pipelines, containerizing applications, automating cloud infrastructure, deploying scalable services, and improving application reliability and performance. Strong backend engineering background with hands-on experience building REST APIs, asynchronous processing systems, production deployments, and cloud-integrated applications.

PROFESSIONAL EXPERIENCE

Vervebot.io, *Software Engineer | DevOps / Cloud Focus* 07/2024 – Present | Gurugram , India

- Supported the development, deployment, and maintenance of production applications and cloud-based services for a US-based grocery retailer.
- Worked with **AWS, Docker, Nginx, PM2, GitHub Actions, Redis, MongoDB, and PostgreSQL** to deploy and operate production workloads.
- Built and maintained **CI/CD pipelines using GitHub Actions**, automating application builds, testing, and deployment workflows.
- Containerized backend services using **Docker**, improving deployment consistency across development and production environments.
- Configured **Nginx as a reverse proxy** and managed Node.js production processes using PM2.
- Integrated **AWS S3 and AWS Textract** into production workflows for secure document storage and automated invoice processing.
- Worked with **Redis and BullMQ** to implement asynchronous background processing and improve application reliability and performance.
- Optimized MongoDB and PostgreSQL queries and implemented Redis caching to improve application performance and scalability.
- Developed and maintained **70+ REST APIs** supporting inventory, invoicing, authentication, pricing, and reporting workflows.
- Contributed to production systems that reduced manual data entry by **70%** and improved invoice processing time by more than **60%**.

TECHNICAL SKILLS

Backend
GOLang, Node.js, Express.js, NestJS, TypeScript, REST APIs, Socket.IO , JWT, OAuth

CLOUD
AWS: EC2, S3, IAM, VPC, RDS, ECR, ALB, Route 53, CloudWatch

CI/CD & Version Control
Git, GitHub, GitHub Actions, Automated Testing, Automated Deployment

DEVOPS
Docker, Docker Compose, Kubernetes, Helm, Terraform, GitHub Actions, CI/CD, Nginx, Linux, Bash

Databases
MongoDB, PostgreSQL, Redis

MONITORING
Prometheus, Grafana, CloudWatch

Core Concepts
System Design, Authentication, Caching, API Security, Microservices

PROJECTS

Production Cloud Deployment & CI/CD Platform, *AWS, Docker, Kubernetes, Terraform, GitHub Actions, Nginx* 08/2025 – 02/2026

- Containerized production services using **Docker** and Docker Compose.
- Automated **CI/CD pipelines** with GitHub Actions for testing, builds and deployments.
- Provisioned **AWS infrastructure using Terraform (IaC)**.
- Designed AWS infrastructure with **VPC, IAM, EC2, RDS, S3, ECR and ALB**.
- Deployed services on **Kubernetes** with Deployments, Services, Secrets, Ingress and HPA.
- Implemented **monitoring and observability** using Prometheus, Grafana and CloudWatch.

Production Reliability Platform 08/2025 – Present

Go | Kubernetes | Docker | AWS | Terraform | GitHub Actions | Prometheus | Grafana | OpenTelemetry

- Built and operated a **production-grade Go microservices platform** using Docker, Kubernetes and AWS.
- Automated **CI/CD pipelines** with GitHub Actions for testing, builds and deployments.
- Implemented **Kubernetes health checks, rolling deployments and HPA** for availability and scalability.
- Provisioned **AWS infrastructure using Terraform (IaC)**, including VPC, IAM, compute, ECR, load balancing and databases.
- Implemented **Prometheus, Grafana and OpenTelemetry** for monitoring, metrics, dashboards and alerting.
- Performed **failure and recovery testing** across application, Redis and database components.

ICMS, *Tech Stack: Node.js • Express.js • React.js • MongoDB • PostgreSQL • AWS S3 • AWS Textract* 02/2024 – Present

- Built an **enterprise inventory and chain management platform** for a US-based grocery retailer.
- Developed **scalable REST APIs** for inventory, invoicing, product catalog, pricing, reporting and authentication.
- Automated inventory and invoice workflows, reducing **manual data entry by 60%** and improving processing time by **50%+**.
- Integrated **AWS S3 and Textract** for secure document storage and automated invoice extraction.
- Improved **application scalability and reliability** using Redis caching, asynchronous processing and database query optimization.

EDUCATION

Bachelor of Computer Applications (BCA), *Kurukshetra University* 2022 – 2025
