

# Tushar Kalra

## Backend Engineer | Node.js | Express.js | MongoDB | Scalable Systems

Gurugram | tusharkalra307@gmail.com | +91-72064-05935

### SUMMARY

Backend-focused software engineer with hands-on experience building SaaS products, scalable APIs, real-time applications, and business automation systems. Strong understanding of authentication workflows, API design, media processing pipelines, and database architecture.

### SKILLS

Backend: Node.js, Express.js, REST APIs, WebSockets

Frontend: React.js, Tailwind CSS

Databases: MongoDB, SQL

Systems: Authentication, API Design, Caching Concepts, Scalable Architectures

Tools: Git, Linux, WSL

Languages: JavaScript, TypeScript, Python

### EXPERIENCE

#### Software Engineer – Vervebot.io (Nov 2024 – Present)

Built a full-stack Inventory & Chain Management System (ICMS).

Reduced manual data entry by 60% via barcode scanning and API automation.

Optimized invoice processing time by over 50%.

Designed analytics dashboards for real-time business insights.

### PROJECTS

#### relook — Customer Testimonial SaaS Platform

Built a SaaS platform for collecting and showcasing video, audio, and text testimonials.

Implemented JWT authentication and OTP email verification workflows.

Developed browser-based video/audio recording and secure media upload pipelines.

Built moderation dashboards, analytics systems, and embeddable testimonial widgets.

Tech Stack: Node.js, Express.js, MongoDB, React, Tailwind CSS, Cloudinary

#### Payment Gateway

Designed payment processing workflows, transaction tracking, and webhook handling.

Built secure authentication and merchant management APIs.

Focused on scalable backend architecture and transaction lifecycle management.

#### Inventory & Chain Management System (ICMS)

Built backend architecture for invoice processing, product cataloging, and inventory management.

Developed analytics and reporting modules for business operations.

### EDUCATION

Bachelor of Computer Applications – Kurukshetra University (2022–2025)
